Support Engineer

Today's Agenda

- 1 Introductions
- 2 Voice of The Customer
- 3 Inkit's Mission & Background
- 4 Overview of Inkit Capabilities
- 5 Next Steps & Questions

Voice of the Customer

 **DEPUTY SECRETARY OF DEFENSE**
1010 DEFENSE PENTAGON
WASHINGTON, DC 20301-1010

DOPSR 23-S-2095 MAY 10 2023
CLEARED
For Open Publication

MEMORANDUM FOR SENIOR PENTAGON LEADERSHIP
COMMANDERS OF THE COMBATANT COMMANDS May 22, 2023 5
DEFENSE AGENCY AND DOD FIELD ACTIVITY DIRECTORS

SUBJECT: DoD Records Strategy Department of Defense
OFFICE OF PREPUBLICATION AND SECURITY REVIEW

Information and records are essential for effective decision-making and DoD's mission success in implementing the National Defense Strategy. The DoD Records Strategy (attached) establishes the Department's direction for well-managed records, providing decision makers with the context to act based on trustworthy information, historical consistency, and analytical rigor.

The DoD Records Strategy:

- Envisions a DoD information enterprise in which records are curated, records management processes are automated, and governance accountability is clear;
- Identifies four key enablers for an enterprise where all records are lifecycle managed and discoverable by authorized users at all levels of operations and decision making; and
- Outlines a deliberate and proactive approach of managing records as a national asset across all DoD environments

This strategy will allow the Department to deploy a full spectrum of information for decision advantage. The DoD Chief Information Officer (CIO) and DoD Components will take the initial steps to develop tools for communication and advocacy and revise records policies to achieve the Strategy's goals of records curation, automation, and governance. The DoD CIO will report to me with an update in 45 days.

Kathleen H. Elisch

Attachment:
As stated

Although data systems are modernizing, the process for generating and tracking records is still manual:

- System access forms & security forms
- “Hand-jamming”
- Form versioning
- Form limitations
- Security & Auditability
- Document routing via email or post
- “Burn days”

Problem Areas We Solve

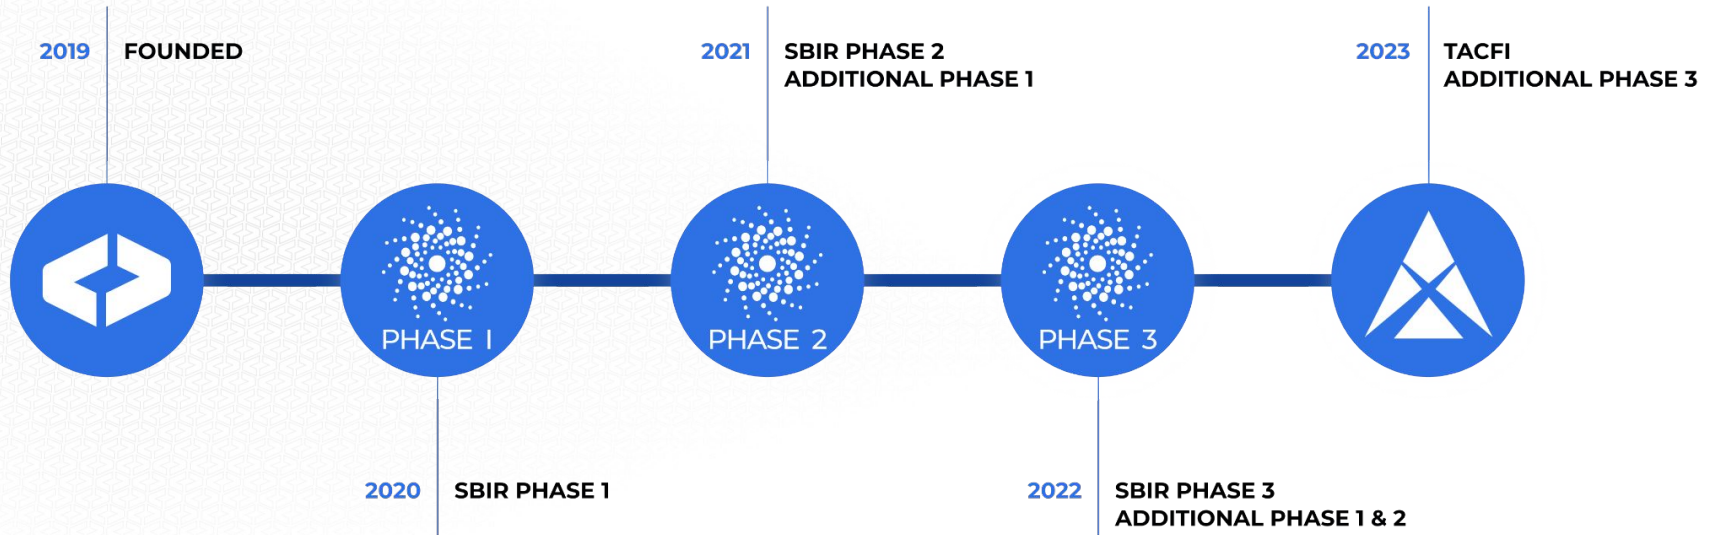

AREAS	ACTIVITIES	IMPROVEMENT EXAMPLES
OPERATIONAL	Onboarding, Checklists, Guides, Field Data, Personnel Records, Records Retention, Property & Asset Management Maintenance, Contract Writing	<ul style="list-style-type: none"> - Material readiness improved - Synchronized documents across commands - Reduce hours spent hand jamming documents - Retain historical documents with the flexibility to automate destruction - Automate lifecycle of personnel records - Reduce Turnover
FINANCIAL	Pay orders, Audit Readiness, Career Lifecycle	<ul style="list-style-type: none"> - Personnel readiness improved by eliminating manual pay orders tied to financial processing for payroll and contracts
PERFORMANCE	Badges, Reviews, Awards, Certificates	<ul style="list-style-type: none"> - Improved readiness by removing paperwork bottlenecks - Increase accessibility when transitioning to the civilian world.
SECURITY	Destroy digital documents, End-to-end encryption, Disappearing documents	<ul style="list-style-type: none"> - Prevent information leaks and data spillage - Decrease security risk thru accredited ATO software - Automated destruction - AES 256 Symmetric Encryption End to End and a TLS 1.3 connection

**Safeguarding your
privacy & freedom for a
better tomorrow.**

Manually creating documents, filling out forms, and information leaks are a thing of the past.

Inkit automates the journey of information with our Secure Document Generation (SDG) solution.

The Inkit Story - A Track Record of Success

1. Zero Trust Security
2. Impact Level 4 and 5 DoD Authorizations
3. Third-Party App Integrations
4. Microsoft Office Compatible
5. Small Business Innovation Research (SBIR)
6. Deployed on USAF Platform One

Questions & Next Steps

Small Business Innovation Research (SBIR)

There is no limit on the number, duration, type, or dollar value of Phase III awards made to a business concern

Phase III contracts may be awarded on a non-competitive basis to a Prime contractor or to a Subcontractor at any tier under a government contract

The work may be for products (including test and evaluation), production, services, R/R&D, or any combination thereof

One Platform for All of Your DocGen Needs

Disappearing Documents

Auto-expiring documents based on a set number of views or a specific time

Serverless

Serverless architecture for more efficiency, scalability, and lower costs

Document Streaming

Prevent downloads with view-only document access

Roles & Permissions

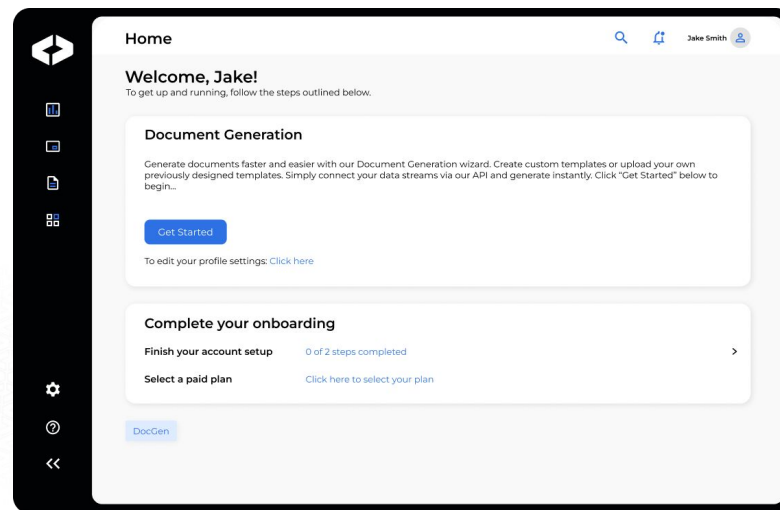

Role-based permissions that reduce unauthorized access

Solution

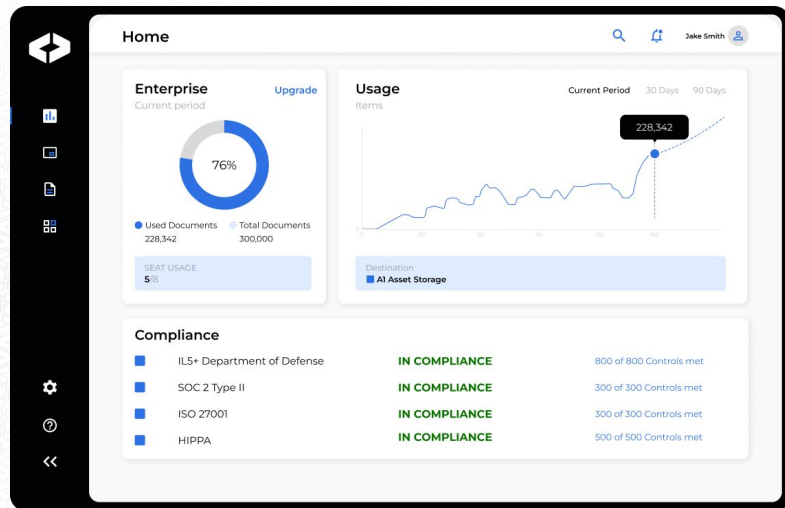

Zero Trust

Generate. Encrypt. Distribute documents in total privacy with the leading DocGen platform.

Experience an all-inclusive solution with advanced encryption for ultimate document control and security.

Solution

Military Grade Security

SOC 2 Type II, ISO 27001, HIPAA, and Impact Level 5+ (FedRAMP equivalent or higher) authorization for maximum security.

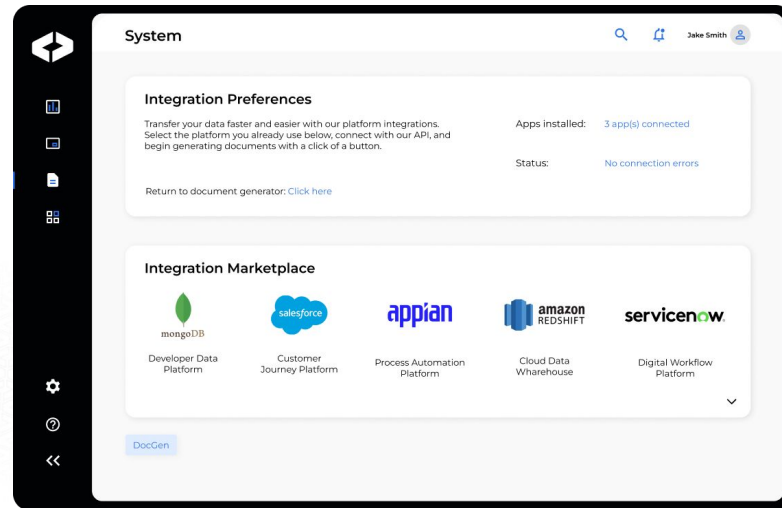

Inkit meets the highest standards for storing and processing sensitive information, mission-critical data, and national security systems.

Solution

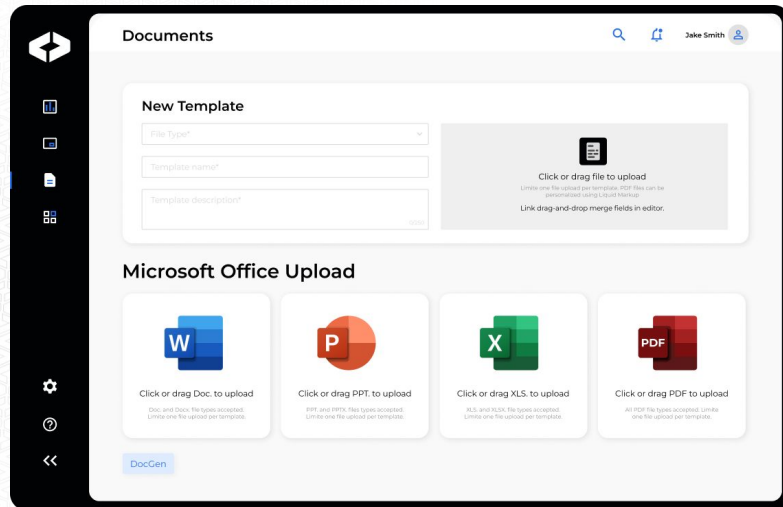

Seamless Multicloud Integration

A privacy-first DocGen tool that offers the best multicloud environment for all your favorite apps.

Inkit seamlessly integrates with Salesforce, Amazon RedShift, and other platforms via our API for effortless compatibility and ease of use.

Solution

Microsoft Office Compatible

Unlock convenience and flexibility with Microsoft Office for all your secure DocGen requirements. Choose the only solution compatible with Doc, PPT, XLS, HTML, and PDF formats.
