

# Go Beyond Folders. Work Simpler.

Your tasks, workflows, documents & records.  
**Together.**

# About Us

**GO BEYOND FOLDERS. WORK SIMPLER.**

We help organizations overcome the inefficiencies that stand in the way of achieving their mission. By listening, understanding, and providing expert guidance, we equip them with tailored software that empowers employees, keeps data secure, and enables unparalleled productivity.

[www.qflow.com](http://www.qflow.com)

**What does the modern knowledge worker want?**

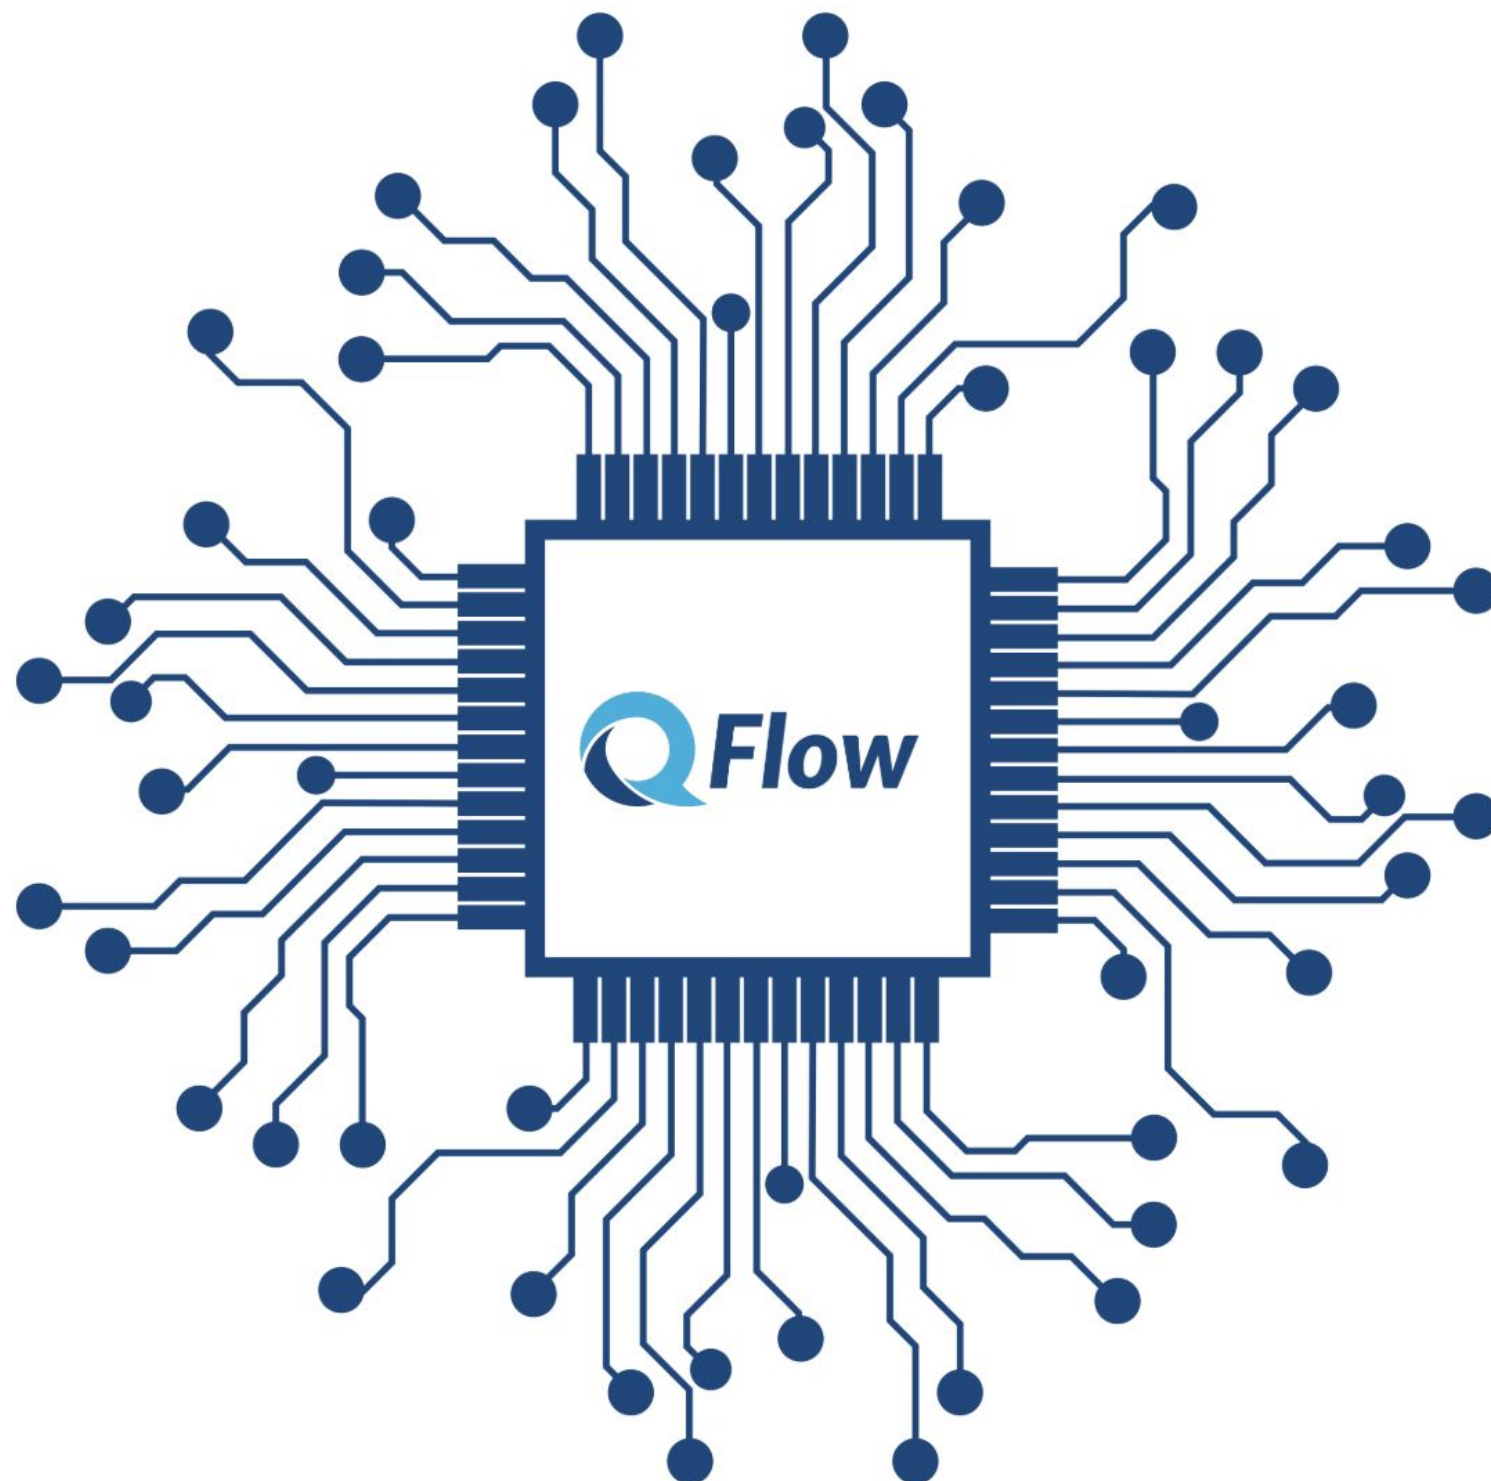

# LLMs aren't enough

To get the most of modern Large Language Models, they require access to “your context”.

To see reliable and valuable results from large language models, users are required to give access to third party companies. A potential privacy and security risk.

**We don't think you should sacrifice privacy & security for productivity.**

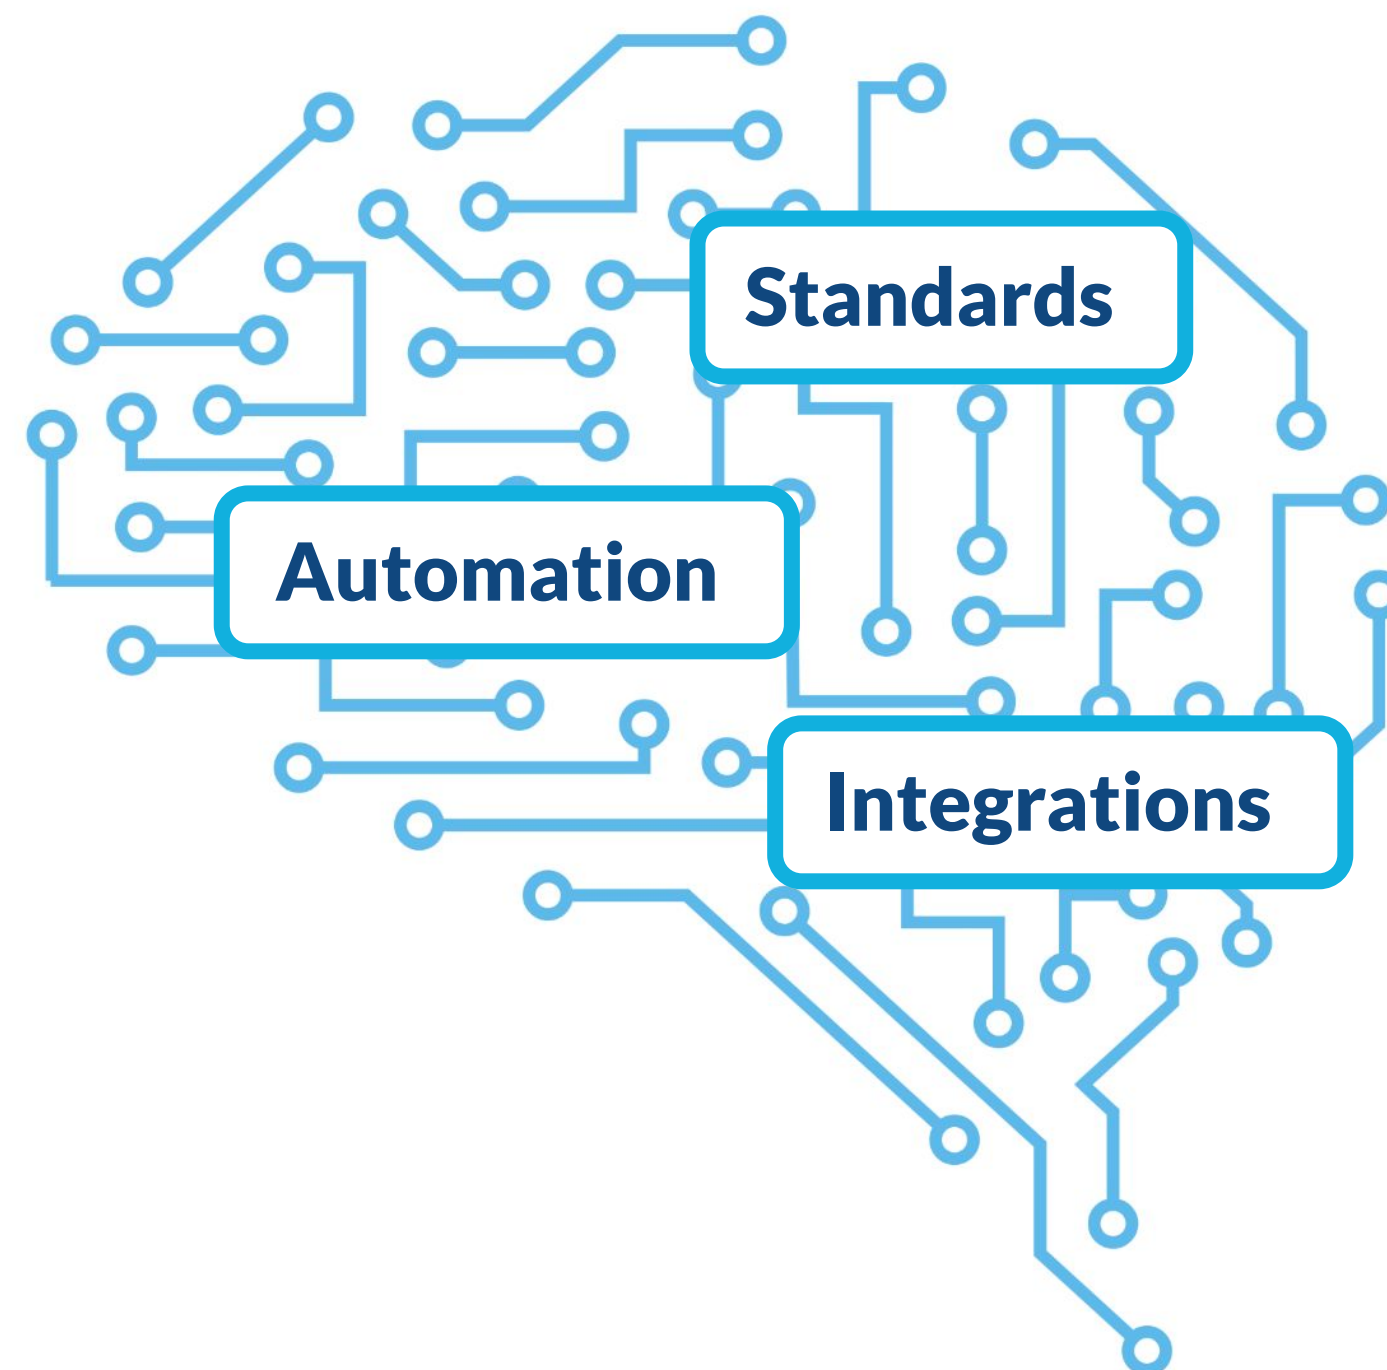

# Secure, Context-Aware AI

Our vision is to enable secure, local LLMs, eliminating the need to send data to third parties and ensuring complete control over sensitive information.

By keeping your data private, structured, and continuously updated, our solution will optimize AI performance while maintaining security and accuracy.

With an intuitive approach, QFlow makes AI adoption seamless, so users can leverage powerful AI capabilities without needing to be AI experts.

# Get Ready **Now**

# Federal agencies need **more than** **traditional automation**

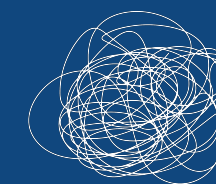

## Unenforced Standards Across Departments

Different teams develop their  
own processes without  
agency-wide consideration.

## Manual Processes

Key tasks are repeated  
**manually**, creating  
**unnecessary effort** and a **high**  
**risk of human error.**

## Disconnected Data Sources

Data exists across **multiple**  
**systems**, document  
repositories, and databases.

# Mission Critical Impact

Annual OGC

**Let Us Show You**

# Standardization. Automation. Integration.

## ENFORCE DATA VALIDATION

Standardized data entry rules across all workflows and content management processes.

## AUTOMATED RETENTION SCHEDULES

Predefined retention policies that ensure compliance with regulatory and agency-specific requirements.

## AUTOMATED PROCESSES

Configurable automation that optimizes things like loan processing, request approvals, and case tracking.

## SHARED SERVICE

Enables multiple sub agencies to leverage a unified, scalable platform for document and workflow management.

## TAILORED AND EXPANDABLE SOLUTION

Adaptable COTS can be easily tailored to unique needs, avoiding "square peg in a round hole" situations.

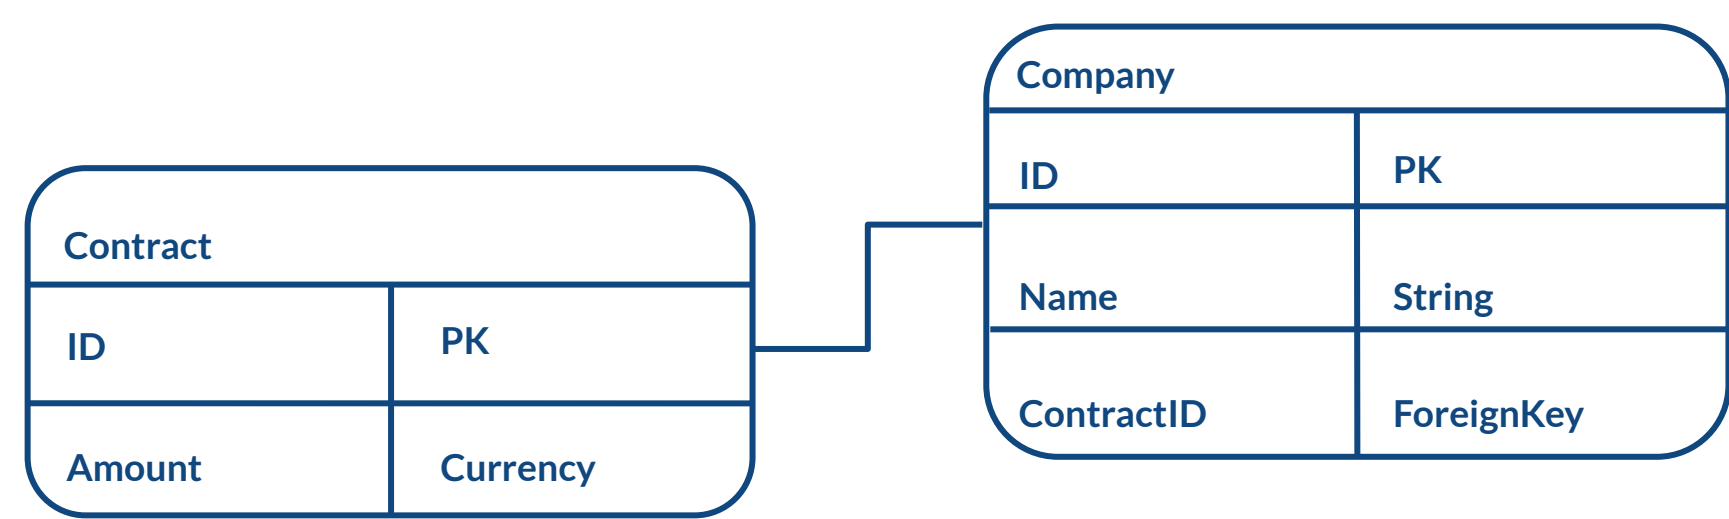

## PREMIER SUPPORT

Real-time support and training available on multiple support channels.

# Bridge to the Future

## Entity Relationship Diagram (ERD)

## Knowledge Graph

# Project ORCA

## Why?

AI tools need context

Sending context to Third-Parties is a non-starter

Building LLM-Friendly Context is Hard

Adopting new tools takes time & investment

Productivity without AI

## What and How?

Knowledge graphs & Retrieval Augmented Generation (RAG)

Local LLM with a choice of models and advanced parameters

Familiar interface for end users = Fast adoption & ROI

Centralized configuration promotes data tagging consistency

Flexible, adaptive and scalable with best practice approaches

# Join Us

QAction is being used at DISA today, so easily start your future of productivity today. As a user of QAction, we invite you to be a part of the foundation of Project Orca as a proof of concept.

## How You Can Participate

We invite collaboration, feedback, and early-stage adoption from agencies looking to modernize their data strategies while maintaining security.

## Do you have questions?
