## About Granite

Granite provides voice, data and other products and services to multi-site businesses and governmental agencies.

# \$1.8 BILLION

## ANNUAL REVENUE

➤ **1.75M**  
VOICE AND DATA LINES

➤ **700k**  
LOCATIONS SERVICED

➤ **6K+**  
SATISFIED CORPORATE  
CLIENTS

➤ **A+**  
RATING ON BBB

➤ **85+**  
FORTUNE 100  
CUSTOMERS SERVED

➤ **80+**  
FEDERAL  
AGENCIES

➤ **\$300 MILLION+**  
DONATED TO CHARITABLE ORGANIZATIONS...  
AND WE'RE JUST GETTING STARTED!

# Introducing Granite's *EPIK* Multi-Line Analog Replacement

Including  
Alarms, Fax, Elevators, POS, Legacy Modems, vIPer &  
SCADA

## The Time to Act is Now

- DoD CIO Memorandum, "Time Division Multiplexing Technology Elimination," October 18, 2021
- Business Case: Estimated Cost Efficiency for NAVY: \$6 Billion reduced to \$24 Million in modernization project spend
  - Data gathered directly from OPNAV N2/N6
- Landscape: Options are not abundant for DoD
  - Media Gateways
  - POTS in a Box
  - **EPIK**
    - Compliant ✓
    - Secure ✓
    - Cost efficient ✓
    - Turnkey ✓

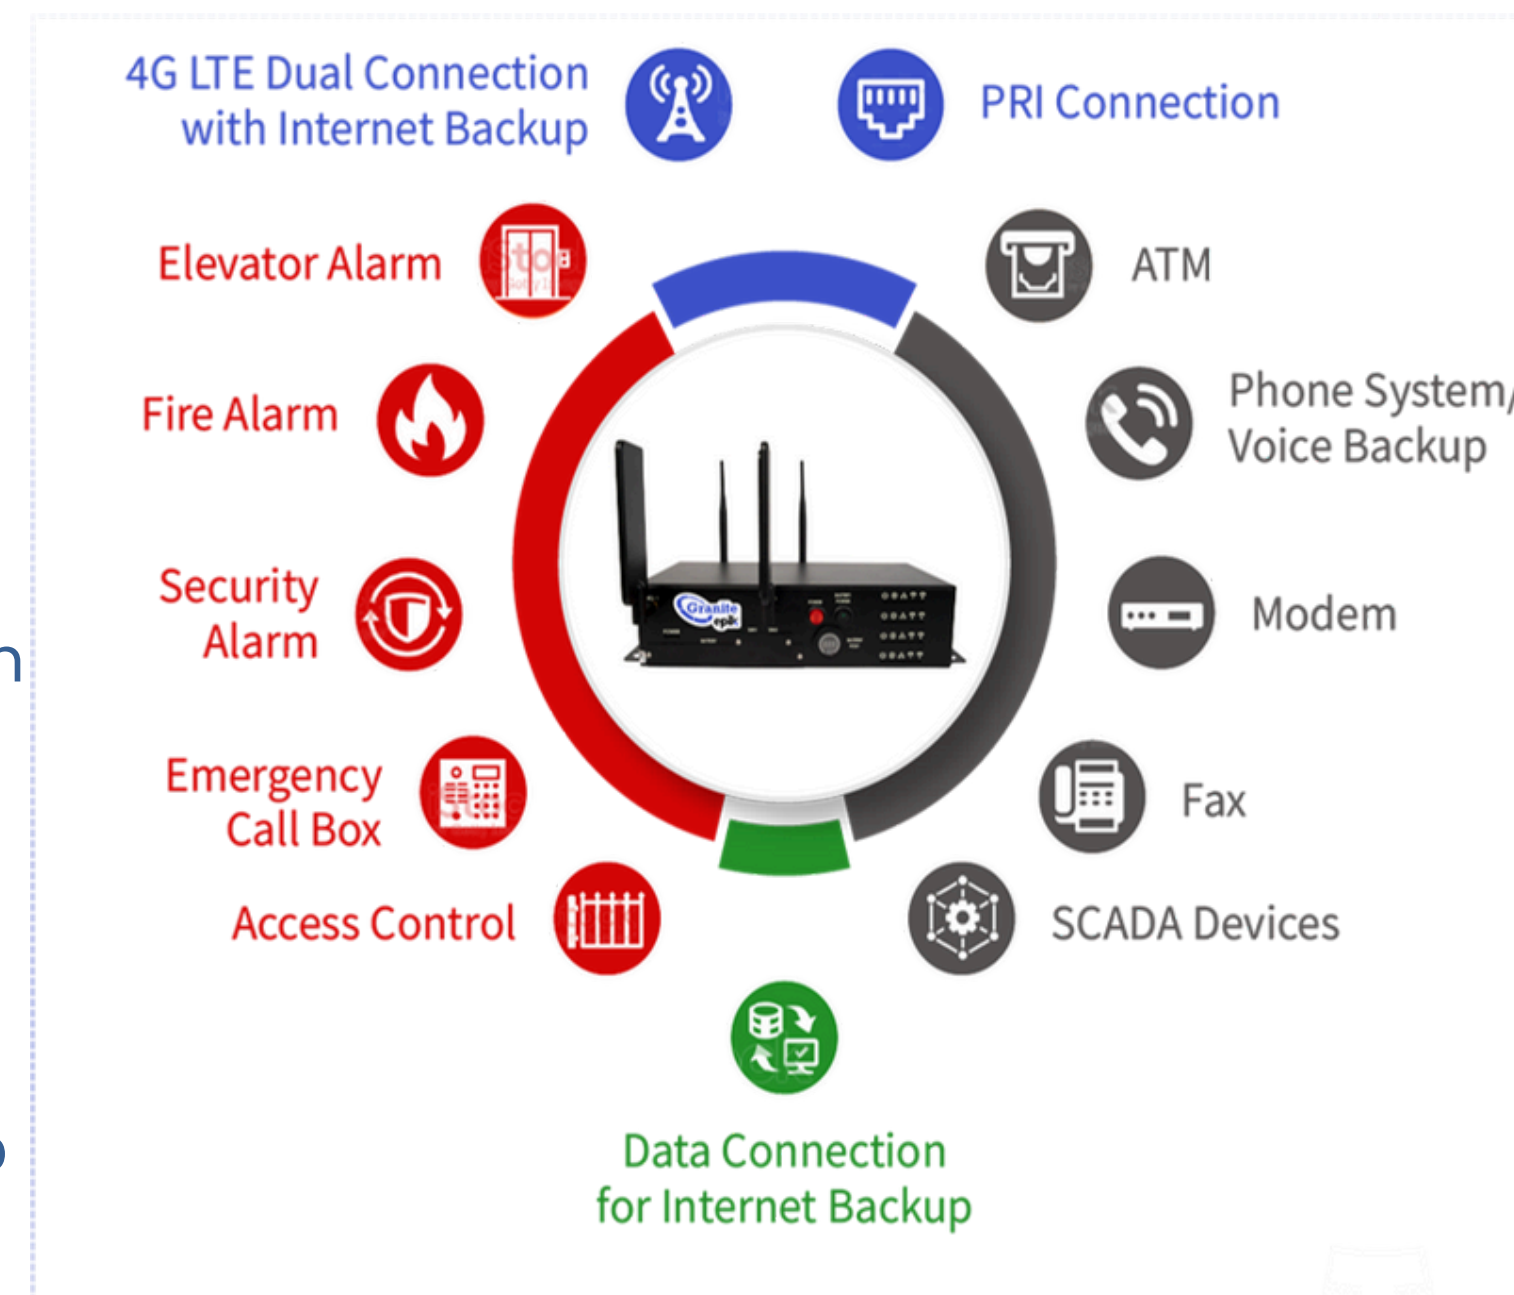

# Granite's *EPIK*

## When to consider

### Security, Resiliency, & Cost-efficiency

- Granite's **EPIK** is a **direct replacement** for existing analog lines, and supports a wide range of life safety, equipment, and hard-to-replace legacy devices, including
  - Alarms and elevator call boxes
  - Emergency calls, blue light boxes
  - Fax (high-volume and long-form)
  - Door or gate access controls
- Granite's EPIK delivers **reliability** equal to or greater than POTS, with connectivity provided by 4G cellular with optional dual SIMs and intelligent failover to internet or PRI, in addition to 24-hour standby battery capacity.
- Granite EPIK is **available across the US** – even in locations no longer served by traditional copper circuits. It can be **installed almost anywhere** without premises wiring.
- **Pricing is consistent** across the US and may enable **savings of up to 30%**.

# Granite's *EPIK*

## How it works

- Granite's EPIK is an **MFVN replacement for existing POTS lines** that delivers cost savings, reliability and availability with an all-in-one solution\*
  - Rack- or wall-mounted Customer Premises Equipment (CPE) that uses 4G LTE, internet or traditional PRI
  - Up to 8 analog phone lines with RJ11, 66-block or PRI hand-off; up to 24 voice lines analog lines with an expansion unit
  - Direct replacement of existing POTS with loop start lines or ground start trunks
  - Internal Li-ion battery provides 24-hour standby power, with 8-hour capacity under full usage
  - Dual-SIM capable on diverse carriers for highest reliability
  - Advanced security with end-to-edge encryption on calls and faxes, private LTE network

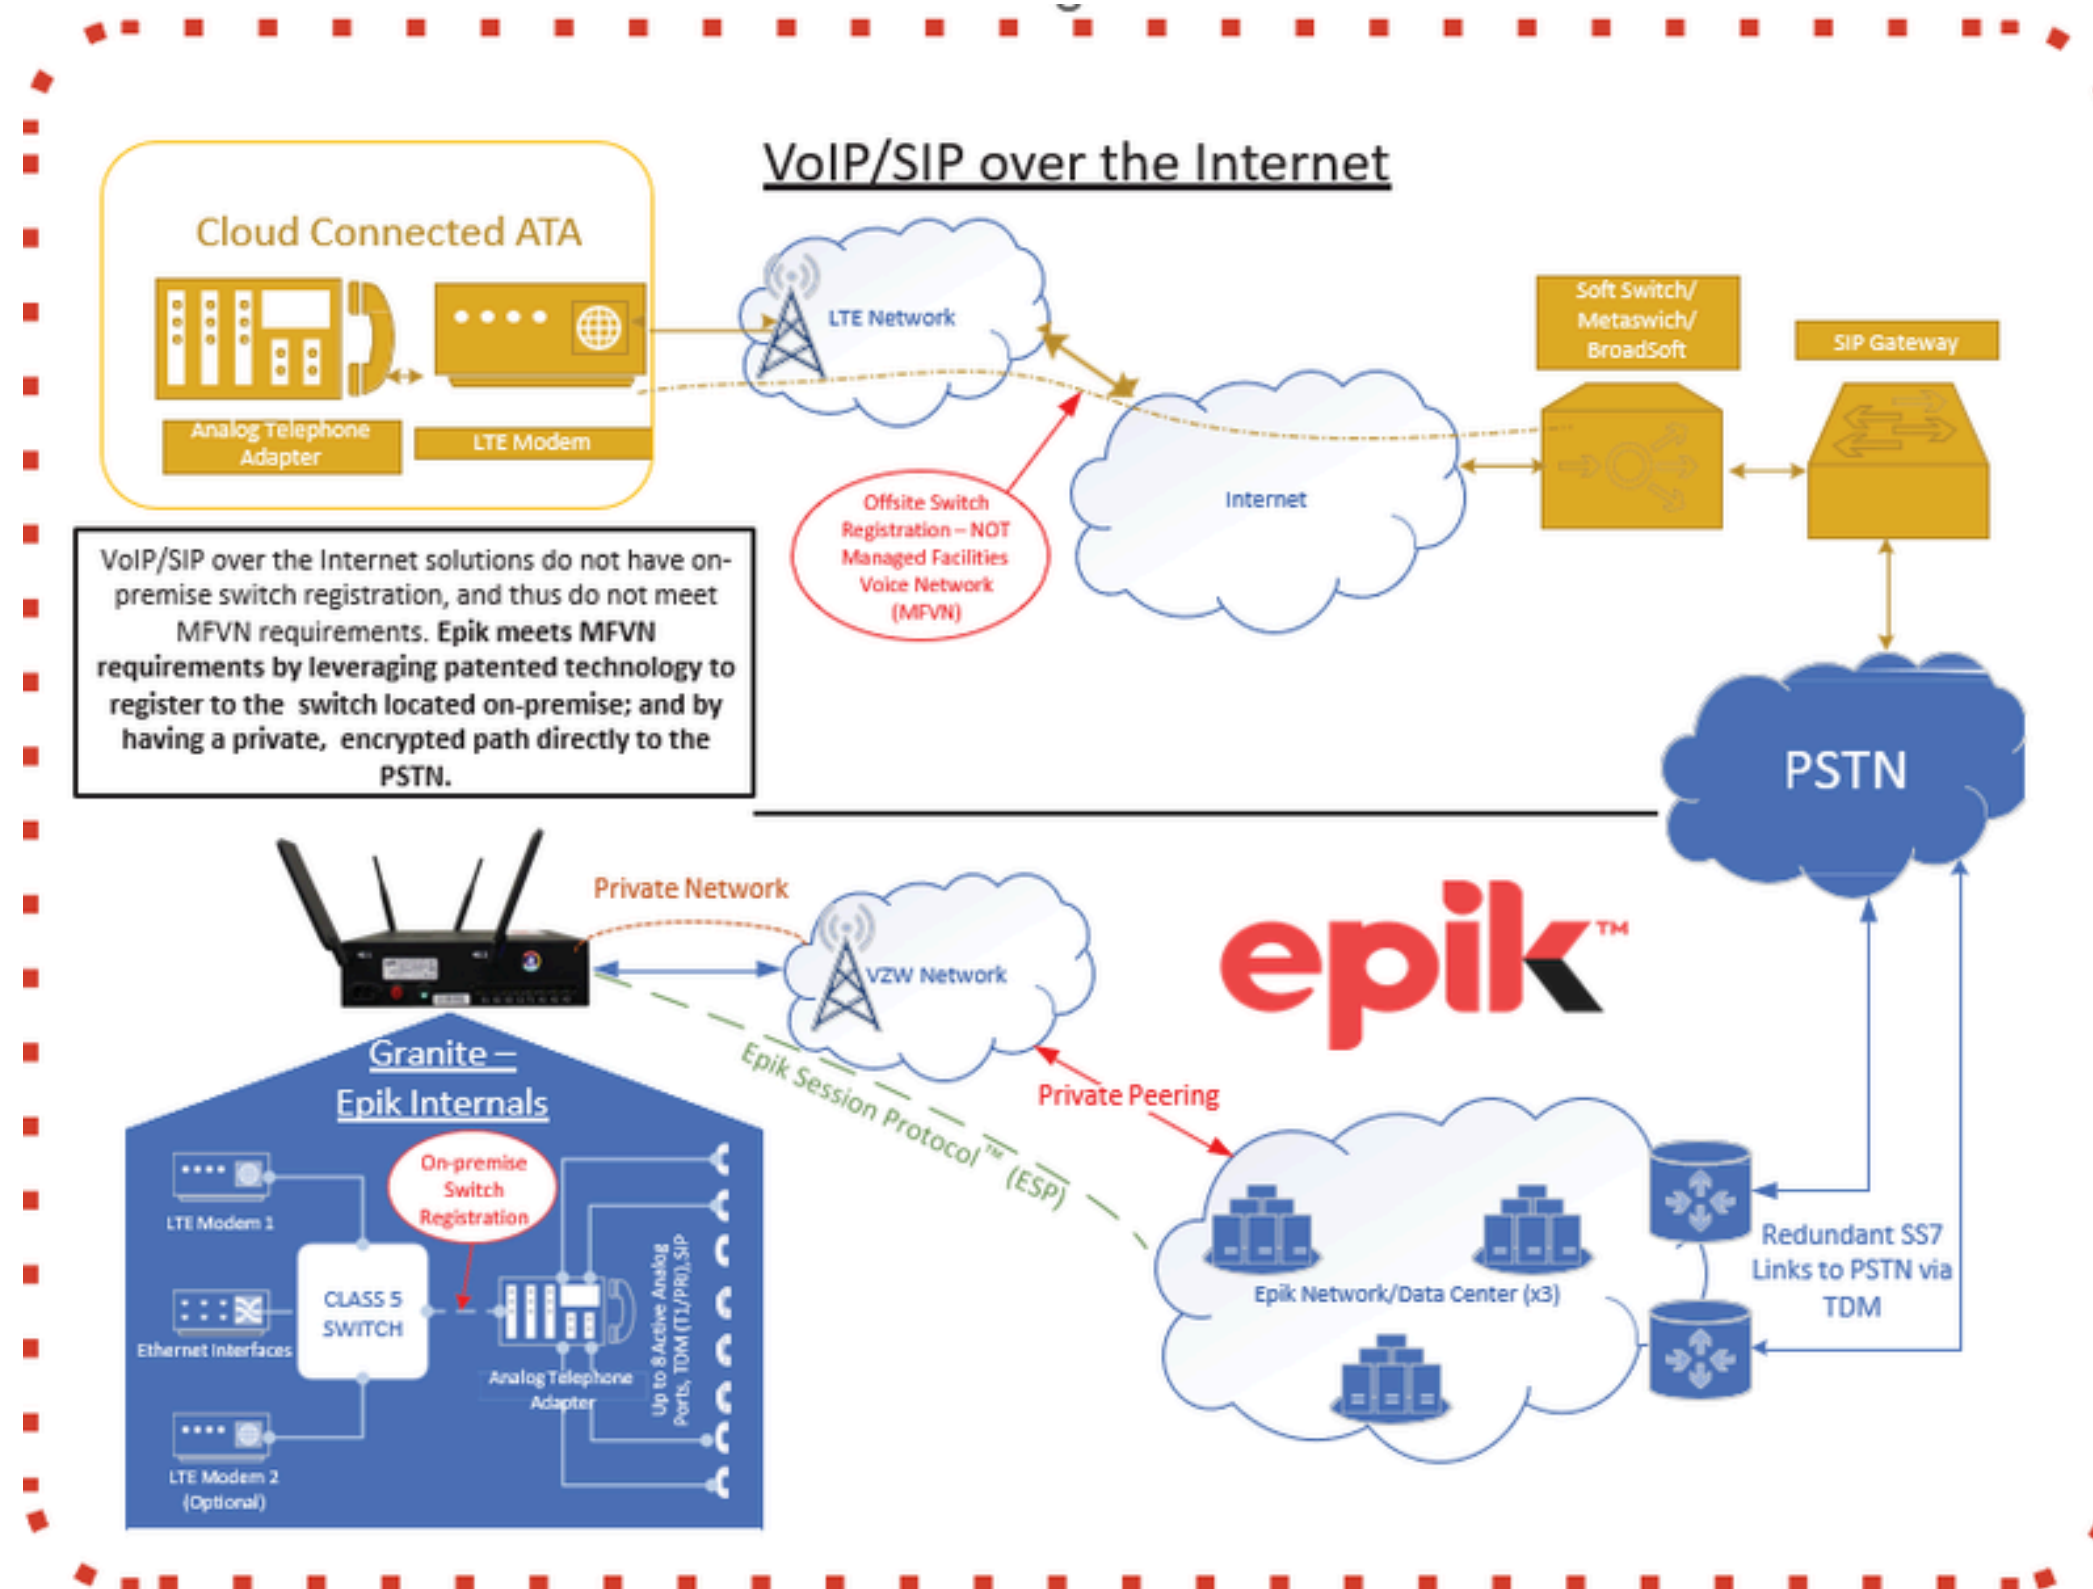

**\* Some jurisdictions may require wireline connections for certain applications (Fire/Life Safety), and wireline connections may be necessary to furnish service at some locations.**

# Granite's *EPIK* The Difference

## Granite's *EPIK* MFVN – Compared to a typical cloud-based ATA

# **Granite's *EPIK***

## **Advanced Monitoring**

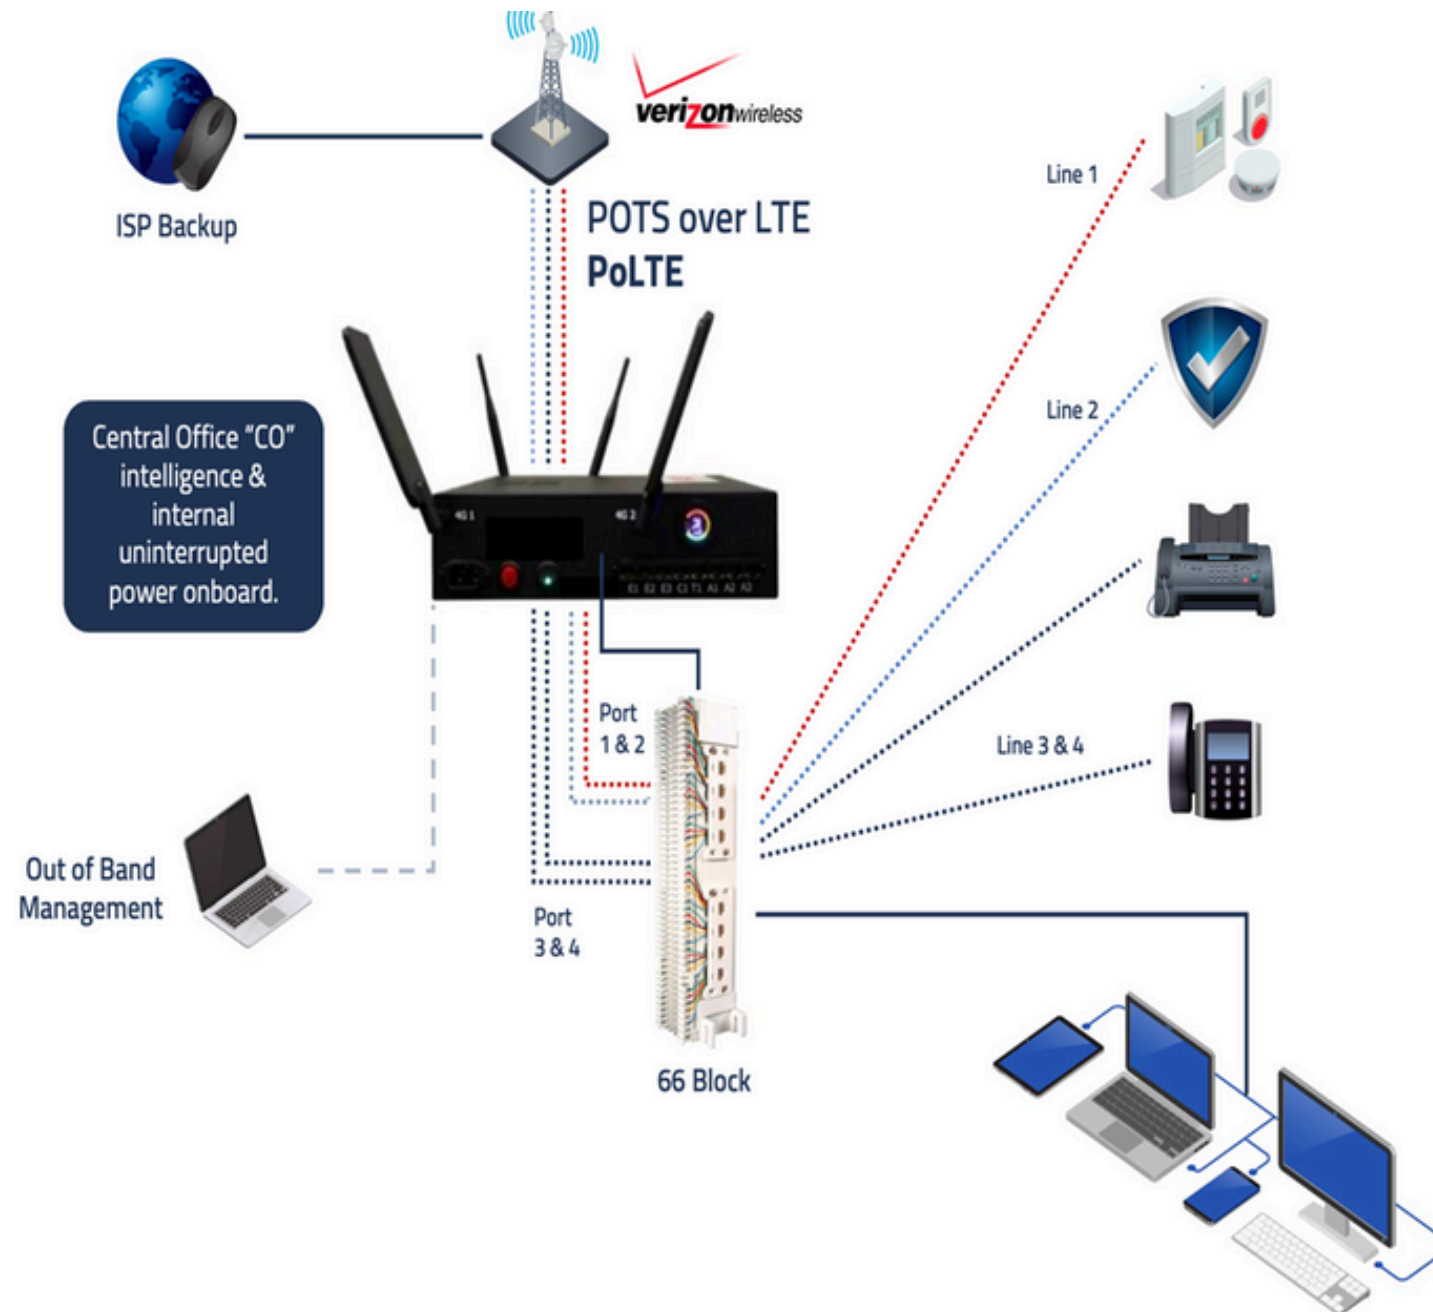

**Granite's *EPIK* provides 24/7/365 monitoring that continually monitors and inspects appliance health and key network and line metrics, and includes auto-notification of detected trouble via e-mail and/or text.**

- **Remote network monitoring software continually inspects:**
  - Packet loss
  - Latency
  - Jitter
  - 4G connectivity
  - Bandwidth utilization
  - CPU usage and memory
  - Individual line status

# Granite's *EPIK* Installation

## Typical "66-Block" Deployment

## Actual Installation Example

# **Granite's *EPIK***

## **Technical Specifications**

- **Dual Path Capable**
- **Private WAN Access over: 4G LTE**
- **Up to 8 analog connections (RJ 11 or RJ 48)**
- **Full Battery Back-up with 24-hour standby and 8-hour full voice usage**
- **Dual WAN equipped- LTE back-up/failover with multi-SIM card support**
- **Number Portability (LNP)**
- **24 x 7 x 365 monitoring and notification**
- **Intelligent PRI and PRI Failover**
- **Remote out-of-band monitoring and management**
- **Auto provisioning support and deployment**
- **Traffic shaping, QoS management**
- **Cloud VPN + Smart MPLS**
- **Customer portal**
- **Location Programmable E-911 with monitoring and geo-fencing**

# Contracting/Acquisition

## Granite holds the GSA EIS and GSA MAS Schedule 70 Contract

Contracting Agency	Contracting Title	Granite Contracting Number	Contract Publication Page
General Services Administration	Multiple Award Schedule	GS-35F-208BA	<a href="#">Contract Page</a>
General Services Administration	Enterprise Information Systems	GS00Q17NSD3004	<a href="#">Contract Page</a>

We are happy to work with your specific command if you have a preferred path to Simplified Acquisition
